INTERNATIONAL
TENT & EQUIPMENT
MANUFACTURING

Utilizing today's industrial fabrics
of all types and specifications.
Featuring R.F. dielectric sealing,
hot air welding and heavy
industrial sewing.

Custom Made Products for all Industries

Sports & Rec. - Commercial - Industrial - Trucking
Construction - Marine - Agriculture - Services

TENSILE STRUCTURES

Textile construction as a component of modern architecture is accepted increasingly all over the world. Membranes permit large area designs such as stadium roofings, which are aesthetical, light weight and durable. Mehler Texnologies Inc. has developed a program for this application that supports the entire variety of textile architecture with application specific finishings. High tear-out forces, special continued tear-out forces and the excellent weldability of the material are designed for the extreme pull and pressure forces of stretched designs.

VALMEX® MEHATOP F is a membrane made of multi-layer composite material with low wick yarns in the carrier fabric. PVDF paints (MEHATOP F) developed by Mehler Texnologies are used for surface paintings. They refine the material and protect it long-term with a twofold paint layer. This is why VALMEX® MEHATOP F-Membrane maintains its unique appearance even under extreme climate conditions and over long periods.

Our tensile fabric design software allows us to custom design a shade structure in any shape or style to present a cosmetic and practical solution for your project.

Our outdoor tensile structures are made from premium, high grade, commercial fabric that can provide the following:

- Waterproof shelter
- UV protection
- Capacity to allow for air flow (to let hot air out)
- Range of custom and standard sizes and colors
- Can be custom designed to suit your individual need.

Selecting and specifying the right tensile fabric for any architectural application just got a whole lot easier. Designed, engineered and manufactured by the world leader in coated tensile fabric technologies, the MEHATOP range of architectural fabrics offers absolute freedom in tension structure design. Whether you need an economical vinyl fabric for use in almost any type of residential structure through to large-scale people protection for public areas, there's a MEHATOP tensile fabric engineered specially for almost every application. And when it comes to choosing the ideal color to complement your project, you simply won't find a bigger, better or brighter selection in our fabric range.
